How to send faxes using RingCentral

Eric Ruthenberg - 2026-11-01 - Comment (1) - Phones

There are several ways to send faxes using your RingCentral phone. You can log in to the RingCentral web page and do it right through that, or you can use any of their desktop and mobile applications. You can even set up your email (or a coworker's) to send faxes right through Outlook.

Click below for step by step instructions for the method you prefer.

Send a fax through your online RingCentral account

Send a fax using RingCentral full app for Desktop

Send a fax on your cell phone using the RingCentral App for Mobile

Send a fax via email

Please contact the helpdesk if you need help with setup or installing any software.
